Mayfair

Mayfair is our dream finish that is guaranteed to give you the wow factor! It is created by mechanically diamond grinding and polishing your concrete. In most instances we will grind 3mm to 5mm to reveal the concrete's true beauty. From large aggregate to fine gravel, it is then polished to a gloss finish.

No concrete floor will ever be the same. Let us create something unique for you.

Regent Street

Regent Street is our most common finish that is created by mechanically diamond grinding and polishing your concrete. In most instances we will remove 1mm to 2mm giving you a salt and pepper look. The floor is then ground smooth and will be polished to desired finish -gloss, satin or matt.

Trafalgar Square

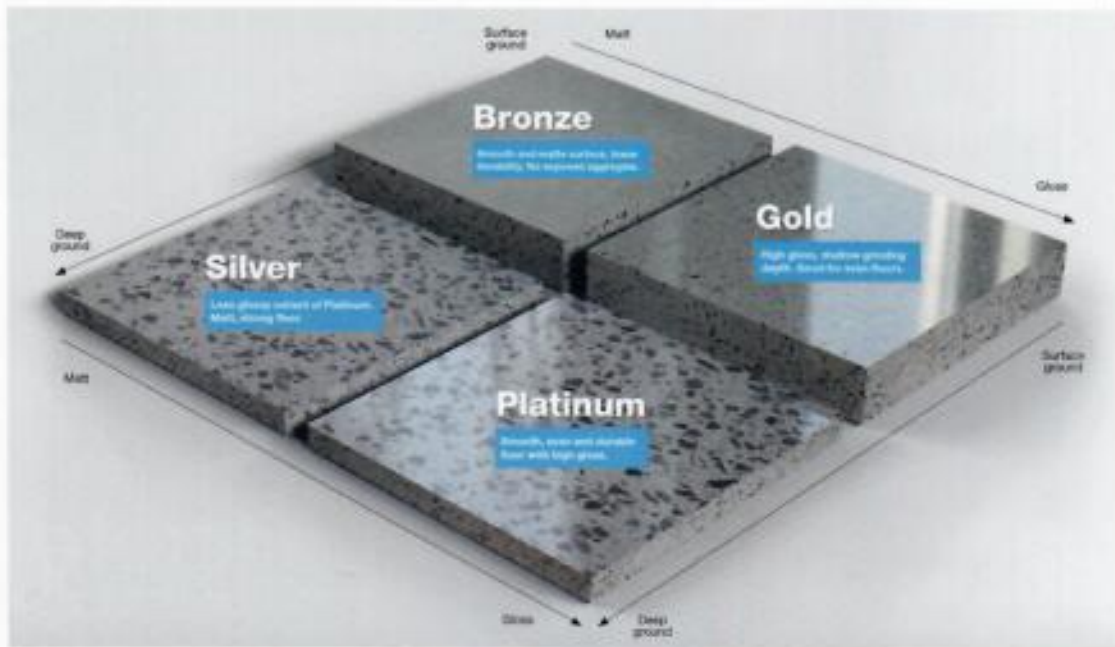

Trafalgar Square is our more natural finish that is created only by polishing and will not expose any further gravel or larger aggregates. Trafalgar Square is the right choice for a retro or industrial look. The polished floor is easier to clean, perfect for around the house or in a warehouse.

Why choose Three Lions Flooring for your next concrete polishing job? We are a family owned and operated company who will always go the extra mile!

At Three Lions Flooring we only use the best grinding and vacuuming systems to speed up your completion time and prevent any disruption on site.

Three Lions Flooring are HTC Superfloor accredited installers.

HTC Superfloor™ Bronze

With its finely honed upper layer, Bronze is the simplest HTC Superfloor™. The aggregate will not be visible. This produces a smooth and matte surface with somewhat lower resistance to wear. Best in applications with limited wear.

HTC Superfloor™ Silver

Silver is a less glossy variant of Platinum because the grinding depth is the same. The polishing steps, however, are fewer. It thus provides a matte but strong floor.

HTC Superfloor™ Gold

Gold entails that the floor is not ground as deep as with Platinum. However, the floor is polished to the same gloss. Gold can therefore be a good choice for concrete floors that are already smooth and even.

HTC Superfloor™ Platinum

Platinum is the best of the best. By repeatedly grinding and polishing the floor, you get a smoother, more even floor with more aggregate exposure and unmatched resistance to wear. Platinum is the most popular surface finish and is a good choice for most applications.
